DETAILED ACTION

1. This communication is responsive to Amendment filed 8/23/2004.
2. Claims 143-148 are pending in this application. Claims 143 and 146 are independent claims. In the Amendment, claims 1-142 were cancelled and claims 143-148 were added. This action is made Final.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 143, 145-146, and 148 are rejected under 35 U.S.C. 103(a) as being unpatentable over McKay et al. ("MacKay", US 5,148,154) in view of Klingler et al. ("Klingler," US 5,404,316).

As per claim 143, MacKay teaches an editing system for editing a plurality of clips, comprising:

editing means for editing said plurality of clips to produce said edit resultant clip (col.4, lines 60-66), comprising:

an edit module for edit processing said plurality of clips (col.4, lines 60-66);

a composite module for composite processing said plurality of clips (col.4, lines 60-66);

and

a special effect module for special effect processing said plurality of clips (col.4, lines 60-66);

wherein said editing means produces module identification information indicating the processing to be performed on said plurality of clips by said edit module, said composite module, and said special effect module in producing said edit resultant clip (col.11, lines 27-38); and

user interface means for displaying and controlling graphical user interfaces corresponding to processing performed by said edit module, said composite processing module, and said special effect module (col.13, lines 1-10).

However, MacKay does not teach link information indicating a tree structure for linking said plurality of clips in producing said edit resultant clip and a clip tree window for graphically displaying said tree structure for said plurality of clips. Klingler teaches an editing system for editing clips that graphically represents the clips in a tree structure for linking the clips together (Klingler, col.2, lines 43-44; col.7, lines 64-68; col.8, lines 1-12). It would have been obvious to one of ordinary skill in the art at the time of the invention to include Klingler's teaching with MacKay's system in order to provide access to clips for easier and faster editing.

As per claim 145, Klingler teaches the current clip to be edited from said clip tree window to be graphically designated in said clip tree window (Fig.16, col.8, lines 1-5).

Independent claim 146 is similar in scope to independent claim 143, and is therefore rejected under similar rationale.

Claim 148 is similar in scope to claim 145, and is therefore rejected under similar rationale.

5. Claims 144 and 147 are rejected under 35 U.S.C. 103(a) as being unpatentable over McKay et al. ("MacKay", US 5,148,154) and Klingler et al. ("Klingler," US 5,404,316) in view of Duffy et al. ("Duffy", US 5,339,393).

As per claim 144, the system of MacKay and Klingler teaches storing of the module identification information and link information in a storage memory (Klingler, col.2, lines 49-50, col.4, line 37) but does not disclose this storage to be a database in which the information relating to said plurality of clips are registered. Duffy teaches an editing system where a database is used to store clip information useful for the editing and re-editing process (Duffy, col.2, lines 19-29). It would have been obvious to one of ordinary skill in the art at the time of the invention to include Duffy's teaching with the system of MacKay and Klingler in order to provide an alternatively efficient means of storage.

Claim 147 is similar in scope to claim 144, and is therefore rejected under similar rationale.

Response to Arguments

6. Applicant's arguments with respect to the Amendment filed 8/23/2004 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2174

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
